My passion is painting. What inspires me most is the nature. The colours the shapes, forms and patterns. When it comes to my work it is all about colour, line and shape. It's very important for me to explore my work as far as possible, by simply repeating and experimenting a process for a number of times to get the best result in the end. My work is mostly abstract and my inspiration is taken from everyday surroundings, such as nature. I often sit outside to draw and paint to get closeness to the object.
